

# TYPES OF WAGERS

**HOW TO WAGER** - When making a bet, always state your bet in the following order: track, amount of bet, type of bet, and number of horse or horses.

**WIN** - When you wager to win, your horse must finish first.

**PLACE** - When you wager to place, your horse must finish first or second.

**SHOW** - When you wager to show, your horse must finish first, second, or third.

**ACROSS THE BOARD/COMBINATION** - When you wager across the board or combination, your horse must win, place or show.

**EXACTA** - Requires a \$1 minimum for each wager. Your top two horses must finish in exact order to collect.

**BOX** - When you box a bet, you collect if your selected horses finish in any order.

**EXACTA BOX** - Involves all possible combinations of a group of horses in the exacta. Combine your picks to finish first or second in every possible combination. For example, a 1-2-3 exacta box covers the following combinations: 1-2, 1-3, 2-1, 2-3, 3-1, 3-2.

EXACT BOX	\$1 BET	\$2 BET
3-Horse Box	\$6	\$12
4-Horse Box	\$12	\$24
5-Horse Box	\$20	\$40
6-Horse Box	\$30	\$40
7-Horse Box	\$42	\$84

**WHEEL** - A wheel combines one horse with all other horses in a race.

**EXACTA WHEEL** - Involves "keying" one horse with others in your wager. For example, an "exacta wheel #6 with all" covers the following combinations (in an eight horse field): 6-1, 6-2, 6-3, 6-4, 6-5, 6-7, 6-8. If this was a \$2 bet, the total cost would be \$14.

**PARTIAL WHEEL** - Involves picking only some of the possible combinations. For example, an "exacta partial wheel #5 with 1,2,3" wins if #5 wins and 1,2 or 3 place.

EXACTA (Partial) WHEEL	\$1 BET	\$2 BET
Wheel Horse w/3 Horses	\$3	\$6
Wheel Horse w/4 Horses	\$4	\$8
Wheel Horse w/5 Horses	\$5	\$10
Wheel Horse w/6 Horses	\$6	\$12

**TRIFECTA** - When you select the first three horses across the finish line in exact order.

**TRIFECTA WHEEL** - Involves "keying" one horse with others in the wager.

**TRIFECTA BOX** - Involves combining all combinations of a group of horses in the trifecta. To calculate how much you will pay, use this simple formula:

**Your cost = \$ Amount of wager x # of bets.**

Example: \$1 trifecta box with 4 horses = \$24

**SUPERFECTA** - Choosing the first four horses across the finish line in exact order.

**SUPERFECTA WHEEL** - Involves "keying" one horse with others in the wager.

**SUPERFECTA BOX** - Involves combining all combinations of a group of horses in the superfecta.

**DAILY DOUBLE** - Involves picking the winners of two consecutive races.

**PICK 3** - Involves picking the winners of three consecutive races.

**PICK 4** - Involves picking the winners of four consecutive races.

\$2 WIN PAYOFFS			
ODDS	PAYS	ODDS	PAYS
1-5	\$2.40	8-5	5.20
2-5	2.80	9-5	5.60
1-2	3.00	2-1	6.00
3-5	3.20	5-2	7.00
4-5	3.60	3-1	8.00
1-1	4.00	7-2	9.00
6-5	4.40	4-1	10.00
7-5	4.80	9-2	11.00
3-2	5.00	5-1	12.00
		6-1	14.00
